Winners vs. Losers

When a winner makes a mistake. he says, "I was wrong." When a loser makes a mistake, he says, "It wasn't my fault." A winner works harder than a loser and has more time; A loser is always too busy to do what is necessary. A winner goes through a problem; A loser goes around it, and never gets past it. A winner makes commitments; A loser makes promises. A winner says, "I'm good, but not as good as I ought to be;" A loser says, "I'm not as bad as a lot of other people." A winner listens; A loser just waits until it's his turn to talk about himself. A winner respects those who are superior to him and tries to learn something from them; A loser resents those who are superior to him and tries to find chinks in their armor. A winner feels responsible for more than his job; A loser says, " I only work here." A winner says, "There ought to be a better way to do it." A loser says, "That's the way it's always been done here."

Control Your Eating

Six tips for controlling how much you eat.

Move on. When you eat out, go elsewhere for afterdinner coffee so you are less tempted to segue right into dessert.

Play hard to get. Put the most tempting foods high up * in the cupboard, at the very back of the fridge, or in other inconvenient spots. *

Replace the cookie jar and candy bowl with a fruit bowl.

Downsize. Many small containers are better than a few large ones, because they provide convenient stopping points. Never eat directly out of a large package.

Plan ahead. Decide how much you're going to eat before an event and do your best to stick with that plan. Set some limits before you go to the movies or watch the Sunday afternoon football games. It's so easy to mindlessly munch when you're in front of a screen of any kind.

Be a copycat. Look around. • Who's eating the least? Who has the healthiest food on their plate? Model your eating habits on that person's.

Keep it the same. Don't push out too many different varieties of the same kind of food. You'll be tempted to

sample each one and eat a lot more than if you had fewer choices. (Harvard Health Letter)
