

Brownsburg Meadows earns another deficiency-free score

21 hrs ago

SUBMITTED PHOTOBROWNSBURG MEADOWS: The assisted living facility recently received a deficiency-free score from state health department.

Brownsburg Meadows Assisted Living was again found to have no deficiencies during an inspection by the Indiana State Board of Health (ISDH).

Operated by American Senior Communities, Brownsburg Meadows Assisted Living is at 7133 Meadow Trail, on a campus with a continuum of care. The ISDH inspects licensed facilities to assess compliance with state standards of care, such as adequacy of staffing, quality of care and cleanliness of facilities.

A deficiency-free score is the best score an assisted living community can receive and is a distinction achieved by a low percentage of such communities statewide. Last year's inspection also showed the community had no deficiencies.

"We are so proud of the staff for living out our values of providing compassionate attentive care, focused on relationships and excellence," General Manager Kris Graphman said. "Without the staff's high level of dedication and commitment, this deficiency-free survey would not be possible."

Brownsburg Meadows Assisted Living also offers assisted living for people who need memory care. In addition to assisted living and independent living garden homes, the campus includes healthcare services that provide skilled and long-term care, Auguste's cottage memory care, moving forward rehabilitation and hospice.
